

HTML Component Reference Guide

Meridian Partners LLP

Web Development & Marketing

Version 4.0 | Effective February 2025

1. Component Overview

This guide provides the approved HTML patterns for all interactive and structural components used on meridianpartners.com. All HTML must use these patterns exactly. Custom HTML is prohibited unless approved by the Web Development team.

2. Audio Player Component

RULE: USAGE

Expert Analysis only. Do not add the audio component to any other content type.

The audio player is rendered below the article title and above the body content. The CMS audio pipeline generates the audio file automatically after publication.

```
<div class="mp-audio-player"
  data-article-id="[ARTICLE-ID]">
  <button class="mp-audio-btn"
    aria-label="Listen to this article">
    <span>Listen to this article</span>
  </button>
  <span class="mp-audio-duration"
    aria-live="polite"></span>
  <div class="mp-audio-progress"
    role="progressbar"
    aria-valuemin="0" aria-valuemax="100"
    aria-valuenow="0">
    <div class="mp-audio-progress-bar"></div>
  </div>
</div>
```

Accessibility: The button must include aria-label. The progress bar must include role="progressbar" with aria-valuemin, aria-valuemax, and aria-valuenow. The duration span uses aria-live="polite" to announce duration to screen readers.

3. Download Button Component

RULE: USAGE

White Papers only. Do not add the download component to any other content type.

The download button triggers the gated content form. After submission, the user receives the PDF via email and is redirected to a thank-you page with a direct download link.

```
<div class="mp-download-cta">
  <button class="mp-btn mp-btn-primary
    mp-btn-download"
    data-gate-form="[FORM-ID]"
    data-asset="/assets/whitepapers/
    [FILENAME].pdf"
    aria-label="Download [Title]">
    Download Full White Paper
  </button>
</div>
```

```

</button>
<p class="mp-download-note">
  <small>Registration required.</small>
</p>
</div>

```

The download button must appear in two locations on White Paper pages:

- Primary: below the executive summary, above key findings
- Secondary: at the bottom of the page, above the author bio

4. Footnote Component

RULE: USAGE

Expert Analysis, White Papers, and Outside Publications. Never use on Blog Posts or Insights.

4.1 Inline Reference

```

<sup class="mp-fn-ref">
  <a href="#fn-[N]" id="fn-ref-[N]"
    role="doc-noteref"
    aria-label="Footnote [N]">[N]</a>
</sup>

```

4.2 Footnote List

```

<section class="mp-footnotes"
  role="doc-endnotes"
  aria-label="Footnotes">
  <h3>Footnotes</h3>
  <ol>
    <li id="fn-1" role="doc-endnote">
      <a href="#fn-ref-1"
        aria-label="Back to reference 1"
        class="mp-fn-back">^</a>
      Smith v. Jones, 585 U.S. 123 (2024).
    </li>
  </ol>
</section>

```

Accessibility: Inline references use role="doc-noteref". The footnote section uses role="doc-endnotes". Each item uses role="doc-endnote". These ARIA roles are required for WCAG 2.2 compliance.

5. Author Bio Component

5.1 Full Bio (Expert Analysis, White Papers, Outside Pubs)

```

<div class="mp-author-bio">
  
  <div class="mp-author-details">
    <h3 class="mp-author-name">

```

```

    <a href="/people/[slug]">
      [Full Name]</a>
    </h3>
    <p class="mp-author-title">
      [Title] | [Practice Group]</p>
    <p class="mp-author-contact">
      <a href="tel:[phone]">[Phone]</a> |
      <a href="mailto:[email]">[Email]</a>
    </p>
  </div>
</div>

```

5.2 Short Bio (Blog Posts)

```

<div class="mp-author-short">
  <p><a href="/people/[slug]">[Full Name]</a>,
  [Title] | [Practice Group]</p>
</div>

```

5.3 Byline Only (Insights)

```

<p class="mp-byline">
  By <a href="/people/[slug]">
    [Full Name]</a>, [Title]
  </p>

```

6. CTA Component

RULE: USAGE

Required on Expert Analysis and White Papers. Optional on Blog Posts. Not used on Insights or Outside Publications.

```

<div class="mp-cta-block">
  <h3 class="mp-cta-heading">
    [CTA Headline]</h3>
  <p class="mp-cta-body">
    [CTA Description]</p>
  <a href="[URL]"
    class="mp-btn mp-btn-primary">
    [Button Text]</a>
</div>

```

Default CTA links to the relevant practice group page. Custom CTAs require Marketing approval.

7. Related Content Component

7.1 Auto-Generated (Blog Posts)

The CMS generates related content automatically based on practice group and topic tags. Three items displayed. No manual intervention needed.

7.2 Manually Curated (Expert Analysis, White Papers)

Content editors select related items during the editorial workflow. Expert Analysis: 3 items. White Papers: 4 items. Items

must be published and active.

```
<section class="mp-related"
  aria-label="Related content">
  <h2>Related Content</h2>
  <div class="mp-related-grid">
    <article class="mp-related-card">
      <a href="[type]/[slug]">
        
        <h3>[Title]</h3>
        <p class="mp-related-meta">
          [Content Type] | [Date]</p>
      </a>
    </article>
  </div>
</section>
```

8. Read Time Component

RULE: USAGE

White Papers only. Do not display on any other content type.

```
<div class="mp-read-time"
  aria-label="Estimated read time">
  <span>Estimated read time:
    [N] minutes</span>
</div>
```

Calculate read time based on the full document word count divided by 200 words per minute, rounded up to the nearest minute. Use the full PDF word count, not the web summary.
