

Footnote Policy

by Content Type

Meridian Partners LLP
Marketing & Communications Department
Version 1.0 | Effective March 2025

1. Purpose

This document consolidates the footnote policy for all Meridian Partners web content types. It serves as a quick reference for when footnotes are permitted, prohibited, or required.

2. Footnote Policy by Content Type

Content Type	Footnotes Allowed
Blog Posts	No
Expert Analysis	Yes
Insights	No
White Papers	Yes
Outside Publications	Yes

RULE: FOOTNOTE ELIGIBILITY

Footnotes are supported on Expert Analysis, White Papers, and Outside Publications only. Blog Posts and Insights do not support footnotes under any circumstances.

3. Content Types That Do Not Support Footnotes

3.1 Blog Posts

Blog posts do not support footnotes. If a source must be cited in a blog post, use an inline hyperlink to the source material. If the content requires extensive citations, it should be published as Expert Analysis instead.

3.2 Insights

Insights do not support footnotes. Insights are short-form content (300-600 words) intended for distribution and syndication. Citations in Insights should use inline hyperlinks.

4. Content Types That Support Footnotes

4.1 Expert Analysis

Expert Analysis pieces support footnotes. Use sequential superscript numbers in body text. The footnote list appears at the bottom of the article, above the author bio. Refer to the HTML Component Reference for the required footnote markup.

4.2 White Papers

White Papers support footnotes. The web page includes footnotes for the executive summary and key findings sections. The full document PDF contains its own complete footnote set.

4.3 Outside Publications

Outside Publications support footnotes. Preserve the original publication's footnote structure when republishing on the Meridian Partners website.

5. Precedence

This document is part of the Meridian Partners house style. In cases of conflict with any external style reference (AP Stylebook, APA, Chicago Manual of Style, etc.), this document takes precedence.
