Compare two versions of an item

Version: 10.2

If you have more than one version of an item and if you are unsure about what the differences are, you can compare two versions field by field.

To compare two versions of an item:

1. In the Content Editor, navigate to the item or page that you want to compare versions for.

Important

If the item has multiple language versions, make sure that you also select the relevant language for the item.

2. In the ribbon, click the **Versions** tab, and in the **Versions** group, click **Compare**.
3. In the **Compare Versions** dialog box, in the drop-down menus, click the version numbers that you want to compare. You can compare two versions at a time.
4. Click **One column** to see the differences highlighted in the same field or click **Two columns** to see them side by side.
