Paste content from Microsoft Word into a Rich Text field

Version: 10.2

If you prefer writing in Microsoft Word, you can write your content in Microsoft Word first and then paste it onto your website.

To paste the content from Microsoft Word into a Rich Text field in Content Editor, use the Paste Word functionality that is available in the Rich Text Editor.

Important

When you paste your Microsoft Word content into the Rich Text Editor, some of the formatting is removed. For example, you lose the text font and size.

To paste content from Word into a Rich Text field:

1. In Word, select and copy all the text that you want to paste into a Rich Text field in Sitecore.
2. In Sitecore, navigate to the item that you want to edit.
3. In the content area, locate the Rich Text field that you want to edit and click

4. Click **Paste Word**  to insert the text into the Rich Text Editor.
5. When you are finished editing in the Rich Text Editor, click **Accept** to save your changes.
